

# Omnec Onec: How to see things from God's perspective

*"As I was born on the planet Venus, in another dimension, and came to your planet as a young child, I was able to retain the knowledge and information that I had gathered as Soul through many incarnations and life times."*

Omnec Onec

OMNEC ONEC is the author of the autobiography "FROM VENUS I CAME". In this book, she portrays her life on the astral level of Venus - a higher level of frequency than the physical that we are familiar with. In a very detailed and clear way, Omnec describes the surface, the society, the history, and the life on the astral dimension of planet Venus. Additionally, Omnec speaks about the adventure of how and why she decided to manifest a physical body and about her journey to Earth in 1955.

FROM VENUS I CAME was first published by the US Col. and UFO Investigator Wendelle C. Stevens in 1991 in the USA. As Omnec was guided to focus her teachings to Europe since 1993, this first book and the next ones have not been published in English since then.

Now in 2012, the time has come for the first release of all of Omnec Onec's books as a compilation edition in English: "THE VENUSIAN TRILOGY"

Omnec Onec's book is neither science-fiction nor fairy tale, but the authentic witness from a woman with universal consciousness.

When asked what aspects of spiritual teachings she considers to be the key, she says:

- "The knowledge that we are Soul"
- "The Power of Love"
- "To see things from God's perspective"

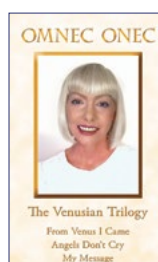

The following text is a small excerpt from Omnec Onec's words on "How to see things from God's perspective":

*"We from the other planets, understand God as the source of creation. We call this source "It" or "The Creator". God loved Itself so much that It created everything so that It would never cease to exist through Its creations. The Soul is a small part of God. Because the Soul was created from God and is a part of God, it is as creative as God Itself. We as Souls carry the same creative abilities within us and therefore have the ability to create what we wish to have and experience as a part of this world."*

*Everything that exists was the imagination of somebody before it became reality. **Imagination is the key to creation.** We have the ability to create with our concentration and with our power. When you ask yourself what the future might bring, you must ask yourself what you really want. We have the power. We ourselves. We have created this world and we can protect it from any harm by focusing our positive energy on the sources and places where there are difficulties, for example, where are wars. All you have to do is to concentrate and send your peaceful and healing energy to these places. You can solve all problems. We say: "**Where the attention goes, the energy flows.**" Whether it's positive or negative energy, is an individually free choice and depends on every individual.*

*If you want to see things from God's perspective, you must be aware that if a person says or does something, he or she says or does something out of an experience, but that's not what this person IS. Even when it seems to be cruel what this person says or does – look at it from the perspective that the Soul of this person only makes an experience.*

*We can't be judgmental of each other. We have to realize, we are not what we do or say. We are Soul, and what we do and say is an experience of this moment or this time that we are in. So we have to be careful of what we think about another person and be aware if we are criticizing, judging, or making fun of somebody, because that could be us in the next moment. That's called "instant karma". I love it when it happens, because then we are aware that we caused this situation with our thoughts. It's like calling somebody a bad name and turning around and walking into a wall of bricks. I think these things are kind of funny. I have a weird sense of humor. But actually I am very much like Earth people. I grew up here and my habits and the way that I live and behave it's very much like you."*

## Book recommendation:

### "THE VENUSIAN TRILOGY"

This trilogy includes Omnec Onec's Venusian autobiography "FROM VENUS I CAME", the second autobiographical part "ANGELS DON'T CRY" plus her spiritual essence "MY MESSAGE".

544 pages with colored picture parts
